

# SPRING PRECAST LLC

Sumter County is home to one of the fastest growing architectural precast concrete companies in the southeast, Spring Precast LLC. Although newer to the Sumter County landscape, this industry has a long history in our home.

Founded in 2014, Spring Precast LLC works with contractors from all across the Southeast. Their market spans from Mississippi, to Florida, the Carolina's, to Alabama, and of course Georgia. Owner, Han Ching Wu, worked in Sumter County for several other companies in the industry before creating what we now know as Spring Precast LLC, which he owns and operates.

Spring Precast LLC creates the large panels you see on the outside of concrete buildings. They use several different techniques and personalize the business plan based on each customer's needs. Their quality products and unmatched services have been utilized for projects of all kinds: amphitheaters, office buildings, schools, high-rise buildings, retail, and more. Their services help beautify a basic concrete building.

Contractors choose to build with Spring Precast LLC because architectural precast concrete is nearly maintenance free, the installation is quick and cost-efficient, and the product is strong and durable.

"I am thankful we get to call Cobb, GA (Sumter County) home because the hospitality is unrivaled and the open spaces leave so much room for our growth. The future is bright and we are excited to continue making our mark both here, and all across the Southeast," says Han Ching Wu, owner of Spring Precast LLC.
